

REGOS Token — Whitepaper

The Digital Asset Backed by Erus Holdings Corp

Version 1.0 — August 2025

Contact: regostoken@gmail.com

Executive Summary

REGOS (Latin for 'King') is the official Solana-based token of Erus Holdings Corp, designed to be a strategic digital asset for capital raising, liquidity generation, and ecosystem growth. Built on the Solana blockchain for speed and cost-efficiency, REGOS aims to be more than a speculative token — it will serve as a bridge between blockchain technology and the diversified portfolio of Erus Holdings Corp.

Introduction

About Erus Holdings Corp: A Florida-based holding company with an expanding portfolio in digital assets, wellness, and strategic investments. Why REGOS? To create a decentralized, liquid, and tradable asset that represents both digital innovation and a bridge to real-world ventures. Meaning of 'Regos': Derived from Latin, meaning 'King', symbolizing leadership, vision, and enduring value.

Market Opportunity

Crypto Market Size: Over \$2 trillion in 2025 and growing rapidly. Solana's Advantage: Transaction fees under \$0.01, scalability for up to 65,000 TPS, and strong DeFi adoption. Target Positioning: REGOS as a premium Solana token with real corporate backing — an alternative to meme coins and purely speculative assets.

Token Utility

REGOS will have multiple real-world and blockchain applications: fundraising for ERUS ventures, liquidity pool staking and yield opportunities, discounts, airdrops, and pre-sale access for ERUS-backed projects, and future integration as a payment token in partner platforms.

Token Economics

Total Supply: 1,000,000,000 REGOS Decimals: 6 Token Type: SPL (Solana Program Library) Allocation: - Treasury (Erus Holdings): 60% — 600,000,000 REGOS - Private & Public Sales: 30% — 300,000,000 REGOS - Marketing & Airdrops: 5% — 50,000,000 REGOS - Staking & Rewards: 5% — 50,000,000 REGOS Initial Pricing: - Private Sale: \$0.001 - Public Launch: \$0.01

Fundraising Strategy

Private Sale: 10M REGOS at \$0.001 to raise \$10,000 for initial LP. Public LP Launch: \$0.01 price with \$10K liquidity. Future Rounds: Based on utility growth and project milestones.

Technology

Blockchain: Solana Advantages: Ultra-low fees, high scalability, active DeFi ecosystem. Wallet Compatibility: Phantom, Solflare, and Sollet. Smart Contract Security: Verified SPL token on Solana Explorer.

Roadmap

Phase 1: Token creation, private sale, LP launch Phase 2: Marketing campaigns, DexScreener/Birdeye tracking, and liquidity growth Phase 3: Staking, payment gateway integration, ERUS project adoption Phase 4: Listing on centralized exchanges (CEX) and utility expansion.

Team

Erus Holdings Corp: Registered in Florida, USA. Leadership: Management team with experience in finance, crypto, and business development.

Legal & Risk Disclaimer

REGOS is a utility token, not a registered security. Investing in cryptocurrency carries risk, including volatility, liquidity risk, and regulatory changes. Investors should conduct their own due diligence.
